

ZONA TARTINA BY NIMÈ STUDIO - MILANO

Nimè Studio - Creative Studio, design and communication.
We study, design and realize everything, from design to communication, from packaging to commercial development of products, to a new way of thinking and offering food.
Explore and reinvent everything is our creativity, the idea of this space comes right from the need of living what we create.

Zona Tartina is all this, an open, unfinished, infinite space, like the possibile transformations, full or empty to fill, with objects, ideas, your ones, our ones, everyones objects.

Zona Tartina - Creative, Food and Design.
This a coffee-store where you can not only eat but also buy the furniture and the products that are inside, like the chairs on which we sit and the lamps hung to the ceiling together with all the Nimè Studio creations and the ones we bring to you.

Zona Tartina - Tartina Location.
It's show-room, temporary shop, an events location, for personal exhibitions, presentations, with or without caffè service and tartineria.

Zona Tartina - Théâtre with biscuits.
It's the games room of "Quelli di Puck" - outpost of poetic resistance, a research group that through the language of art offers its own poetic vision.
Activities, events, publications, laboratories and personal paths or team.
